Medicalholodeck.com is the platform for medical teamwork in virtual reality. The apps are used for 3D surgical planning and medical education in teams.

In an international team, you will be responsible for developing application features, UI in virtual reality, and optimizing computational tasks.

**Your profile**
- 3+ years of software development experience
- 2+ years of experience using 3D engines (Unity, Unreal, etc.)
- 1+ years of experience in computer graphics, rendering, or advanced optimization techniques
- Knowledge of data structures & algorithms and their properties
- Familiar with working and programming with Unity, including writing shaders for the built-in renderer
- Experience in developing virtual reality applications is an advantage
- Good English language
